

The First AI Trading Passive Income Project in the World

Why is AI Trading More Profitable Than Manual Trading?

Artificial intelligence is to trading what fire was to the cavemen.” That’s how one industry player described the impact of disruptive technology on a staid industry.

In other (less creative) words, AI is a game-changer for the stock and forex market.

While humans remain a big part of the trading equation, AI plays an increasingly significant role. According to a recent study by U.K. research firm Coalition, electronic trades account for almost 45 percent of revenues in cash equities trading. And while hedge funds are more reluctant when it comes to automation, many of them use AI-powered analysis to get investment ideas and build portfolios.

What is **SOFTTRADE AI?**

SOFTTRADEAI is an Artificial Intelligence Asset Management Company that uses the advance AI software tools to trade in the Forex market to generate income for our investors.

We are using deep learning techniques to train large neural networks to recognise patterns in data. Unstructured data learning from social media posts and news articles can provide unparalleled insight for developing trading strategies and profitable returns on investment.

Our AI software will use the historical data to learn how the market reacted in past events. Based on these reactions, AI Systems can learn to behave in more productive ways in future market conditions.

Our Investment Managers, with the help Of our AI software, analyse the forex and other investment markets, and based upon those analyses, we generate profitable and adaptive trading portfolios/strategies.

Types of AI?

PERSPECTIVES ARTIFICIAL INTELLIGENCE :

AI is necessary for profitable trading because data is growing exponentially, and there is no way for a human mind to process the enormous amount of data and understand the Rapidly Changing Market Dynamics.

4 TYPES OF AI

- **Reactive Machines:** These are the oldest forms of AI systems that have minimal capability. They emulate the human mind's ability to respond to different kinds of stimuli.
- **Limited Memory:** In addition to having the capabilities of purely reactive machines, are also capable of learning from historical data to make decisions.
- **Theory of Mind:** An approach of mind level AI will be able to understand better the entities it is interacting with by discerning their needs, emotions, beliefs, and thought processes.
- **Self-aware:** Self-aware AI, which, self explanatorily, is an AI that has evolved to be so akin to the human brain that it has developed self-awareness.

Advantages Of Using AI For Generating Forex Trading Profits:

Artificial Intelligence can work without breaks, unlike human beings can do. For these reasons, it can be used to substitute us for processes that it's better not to stop, or can simply do the job in a more continuous way that humans would do.

1

Predicting The outcomes

Another advantage of AI is that it can predict outcomes based on data analysis. For example, it sees patterns in customer data that can show whether the products currently on sale are likely to sell and in what volumes. It will also predict when the demand will tail off.;

2

Operational automation

AI can accomplish complicated assignments much faster than human beings can do, saving a lot of time and speeding up processes that otherwise would take very long. In a way, Artificial Intelligence brings the future closer to us.;

3

No Emotional Barriers

AI algorithms do not present emotional barriers that sometimes can obstruct the success of humans' plans. Machines get to stick to the scheme and keep working towards the defined goal in the way they have been programmed to do, without being affected by external factors.

This sometimes cannot be said for human beings as, often, unexpected events can affect our mood, feelings, and, eventually, our way of working.

How **Softtrade AI** software Works :

Our Investment Managers, with the help Of our AI software, analyze the forex and other investment markets, and based upon those analyses, we generate profitable and adaptive trading portfolios/strategies.

Our CEO

Ryan Baines

Our CEO Ryan Baines is an Expert forex and AI trader with years of experience in digital marketing and brand management. He knows how to build and scale a project from ground up.

How does it **WORK?**

Profitability is our priority

Our AI software will do most of the work while you just have to register, choose, and investment package and invest, and after 3very 24 hours, you get paid on autopilot.

Real-time monitoring and analysis of your profits -

AI algorithms developed to find buying/selling opportunities with the help of our trader.

Optimization and continuous adaptation of the platform

3 AI-Powered Investment Packages At SOFTRADEAI

AI Basic

Package Provides

2% Daily income

for 35 Business days and your daily passive income will arrive from Monday to Friday.

You get **50%** of Your Deposit with this package.

Total Profits on AI Basic Package is

120%

Minimum to Start

\$25

AI Premium

Package Provides

3% Daily income

for 35 Business days and 47 Calendar days and your daily passive income will arrive from Monday to Friday.

You get **50%** of Your Deposit with this package.

Total Profits with AI Premium Package is

155%

Minimum to Start

\$250

AI Automation

This is the best package we have to offer because it provides

5% Daily income

for 30 Business days and 40 Calendar days and your daily passive income will arrive from Monday to Friday.

You get **50%** of Your Deposit back with this package.

Total Profits on AI Automstion Package is

200%

Minimum to Start

\$2000

Partner Program

Our goal is to work permanently and build a widespread global network.

We offer an excellent opportunity to earn extra income by just inviting other members to your team as partners.

Why should you become a SOFTRADE.AI partner?

- We pay INSTANT commissions to our partners.
- Our affiliate program will help you reduce the cost of your investment, and it may help repay it entirely; it all depends on you and your desire to earn.
- Our affiliate program will help you reduce the cost of your investment, and it may help repay it entirely; it all depends on you and your desire to earn.
- The Referral Program for the first level is 7%, for 2nd Level is 2%, 3rd Level is also 2% and for 4th level it is 1%.

August
2020

Launch of Our iOS and android app

Singapore Event

We are excited about our big event in Singapore, where we will meet our investors from all around the world.

Opening Offices in Philippines and Singapore

Real-Time Trading System Integration

Integration of a system where our investors can use the software to trade on our platform and generate profits themselves while using their capital.

End of Scams and Ponzi Schemes

Due to the cryptocurrency boom in 2017, more and more scams have emerged and made, and the investors have to be careful which choosing a project where they can invest their hard-earned money.

Difference Between a Scam and SOFTRADEAI:

The difference between a real platform and a Scam is the information that is being offered by the company and how transparent they are with their investors.

Softradeai is a severe investment platform that has been developed over the last six months, and we have invested a lot of money building this system where a team of recognized professionals' with the help of our ai software provides steady income for our investors.

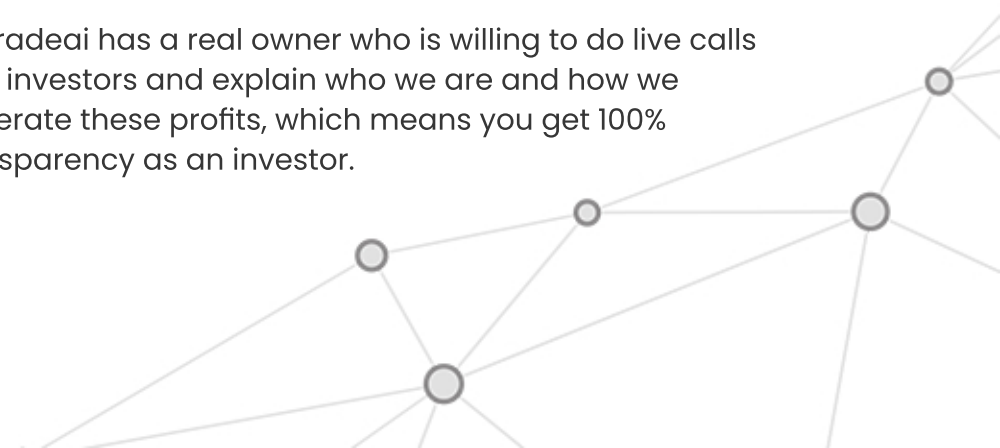

Real Value

Most crypto and other projects only provides profits the money of the new investors. Softrade.AI, in no case, uses percentage of investment from new members for the payments. The payment of the daily returns only comes from the forex trading, and the platform is only supported by 50% to 60% of the capital from investors.

Fake Owners

Softradeai has a real owner who is willing to do live calls with investors and explain who we are and how we generate these profits, which means you get 100% transparency as an investor.

Excitement for Passive Income and Artificial intelligence
